

Controversies in Thrombosis and Hemostasis (CiTH)

CiTH

Berlin, Germany • October 30–November 1, 2014

Chairpersons

Gili Kenet
Pier M. Mannucci
David Varon

Key Dates

Call for abstracts

Deadline for receipt of abstracts: **June 30, 2014**

Registration

Deadline for early registration:
August 4, 2014

CME

An application has been made to the UEMS-EACME® for CME accreditation of this event

Program

Thrombotic Disorders and Anti-thrombotics

- Thrombophilia and Pregnancy Complications
- Screening for Thrombophilia and the Future Role of Heparins and Warfarin
- Direct Factor Xa and Thrombin Inhibitors
- Antiplatelet Therapy and Monitoring
- Pharmacogenomics; Thrombolytic Therapy
- Primary Prevention of Venous Thrombosis and Coronary Artery Disease

Bleeding Disorders

- Plasma Derived vs Recombinant Factor VIII Concentrates
- Replacement Therapy before Surgery of FVII and FXI Deficient Patients
- Immune Thrombocytopenia; Bleeding Complications of New Oral Anticoagulants

Pediatrics

- Epidemiology and Risk Factor of Venous Thrombosis in Children
- Hemophilia Care – Current Guidelines and Applications of New Factor Concentrates
- Heparins, Warfarin and New Anticoagulants for Pediatric Venous Thrombosis
